How To Change The Color Of Solar Fire In Windows 8.1 Command Prompt Method Special thanks to zachariah.slant & gioname video finder for this information, please visit his website :

\* This is a third party app for Android smartphones and tablets made by a company called Witricity. The app was created by a team of electrical engineering students from MIT in the United States in 2015, and has been used by over 200 million people worldwide since its launch in 2015. The app is a portrait-oriented app that can also be used by landscape orientation. It is not a standalone app and requires the phone's camera to be connected to the phone first. There are many other similar apps already available on Google Play for Android smartphones and tablets, including some other similar apps by Witricity. The "Solar Fire" app by Witricity is free to download, but it does contain advertisements.

1) Open the "Solar Fire" app on your smartphone or tablet by typing "solar fire" into both the search box at the top of the screen and then tapping into that search after it opens up. 2) Touch on "Find" (the 3 dots in the top right corner of the screen), and type "Android 4.4" into the search bar. This should bring up a list of all compatible Android smartphones and tablets which can be used for this app. 3) Click on the "Android 4.4" device from your list to open its details page from your phone or tablet's home screen. 4) Click onto "Settings & Tools", and then onto "Use a Mirror." \*8 Important: You must then toggle the "Use a Mirror" slider switch to the right and then click on "Mirror Now" button in order for this app to be able to detect your smartphone or tablet's camera via its USB port. 6) Press and hold down your phone or tablet's back button until you can see all of your apps on your phone or tablet's home screen again, and then click onto the "Solar Fire" app once again. 7) Locate and tap onto the Solar Cell (black triangle underneath an image of a solar cell) near the top of the screen that arrived at this website: <https://www.slant>.
