A few months ago, I created a website that allows you to access quizlet.com through your private browser window. In order to use the website, you have to create an account on quizlet.com. With a little while and a little help, it's easy to learn new vocabulary. [How to Add a New Language to Quizlet](#) I've been asked how to add a new language to my [quizlet](http://quizlet.com) account and with a simple five-step process, you can learn any language in the world. **First Step: Download a New Language File** The first thing you'll need to do is download a new language file from the website. Choose "Download." Then navigate to the language you wish to learn and select the file that's easiest to download. When you're done, you'll need to save it to your computer. In my case, I chose to download the file to my desktop. The file name should look something like this: [alban-qz.csv](#). I'm not going to lie to you: It's a long name, but you'll see what I mean when you read through the steps. The second step is simply to take the file you've downloaded and double click it. The file will be saved to your computer in a folder named like the language you downloaded. If you're not familiar with saving files, it's pretty easy. We're all techies at Quizlet and when you double-click the file you just downloaded, it should open up in your personal computer. All you have to do is save it in the same place you downloaded it. For example, on my computer, the [alban-qz.csv](#) file is in my desktop. The third step is simply to navigate to your Quizlet account and click the "Add Quizlet" button. This is step is important because this step will set your computer to the language you just downloaded. You don't want to add the same language twice. In the "Language Type" box, select the language you downloaded and choose the "Add" button. **Step Four: Click "Start Quizlet"** On your computer, you now need to open your [quizlet](http://quizlet.com) program. In order to do this, you need to make sure your browser is closed. Then, navigate to the website: After you're on the website, click the "Start Quiz 82157476af
